Breath: Google Play launch kit

Package **com.aviratna.breath** · version 1.0.0 · prepared 24 October 2026

Everything to copy and paste into Play Console once your developer account is approved, in the order Play Console asks for it.

Where things stand

√	Android app builds automatically on GitHub; installable APK published
√	Real Breath app icon (replaces Expo's placeholder), feature graphic and 8 screenshots: section 5
√	Store listing text written and length-checked: section 2
√	Privacy policy written: section 6
√	Answers for every App content form: sections 3 and 4
○	**Waiting on Google:** developer account identity verification
√	Privacy policy is public: github.com/aviratna/breath-app/blob/main/PRIVACY.md
√	Fake features fixed: real breath count, working share image, quote attribution (section 7)
○	**Before production release:** real gift delivery between people (section 7)

On approval day, in order

1. **Create app**: fill the form with the answers in section 1.
2. **Get the upload file:** on GitHub, open *Actions → Android release → Run workflow*, choose **play**, then **Run workflow**. About 15 minutes later, download `breath.aab` from the newest *"Breath Play Store bundle"* pre-release on the repo's Releases page. Or ask Claude to do it.
3. **Testing → Internal testing → Create new release:** accept *Play App Signing*, upload `breath.aab`, paste the release notes (section 2), add yourself as a tester and roll out.
4. **Grow your users → Store presence → Main store listing:** paste the text (section 2) and upload the graphics (section 5).
5. **Policy and programs → App content:** answer each form with sections 3 and 4.
6. **Closed testing:** new personal accounts must run a closed test with **at least 12 testers opted in for 14 days in a row** before Google allows a production release. Start collecting Gmail addresses of 12+ people now.
7. **Production:** after 14 days, apply for production access in the Dashboard and promote the release.

1 · Create app form

App name	**Breath**
Default language	**English (United States) – en-US**
App or game	**App**
Free or paid	**Free**
Declarations: Developer Program Policies	**Tick (accept)**
Declarations: US export laws	**Tick (accept)**
Declarations: Play App Signing terms	**Tick (accept)**

2 · Main store listing text

APP NAME *21 / 30 characters*

> Breath: Gift a Breath

SHORT DESCRIPTION *79 / 80 characters*

> A quiet daily count of your breaths, and a way to gift one to someone you love.

FULL DESCRIPTION *1143 / 4000 characters*

> Every being is born with a fixed number of breaths.
>
> The Vedic and Tibetan Buddhist traditions have long held this: not years, breaths. To notice one passing is to notice a little of a life passing with it.
>
> Breath borrows that practice. It keeps a quiet, contemplative count of the breaths remaining in your day, and lets you spend one of your own to reach someone you love.
>
> GIFT A BREATH
> Hold a name to send. It costs you one breath of your own, and that is what makes it sincere. No thread. No reply expected. They simply know you were thinking of them.
>
> WHAT'S INSIDE
> • A daily count of breaths remaining: a contemplative estimate, not a prediction
> • Gift a breath with a single long press
> • Receive a gift and choose to just smile, or breathe one back
> • Share the moment as a simple, quiet card
> • Public figure mode: one to one, not one to a million
> • Block anyone from the privacy settings
>
> A QUIET DESIGN
> Paper-white pages and serif type. No feeds, no likes, no streaks.
>
> PRIVATE BY DESIGN
> No account, no ads, no tracking. Breath does not collect personal data.
>
> Breath is a device for attention. It is not a medical or actuarial tool.

Store settings

App category	**Lifestyle**
Tags (pick up to 5)	**Meditation, Mindfulness, Wellbeing, Relationships (whichever Play offers)**
Contact email (required, shown publicly)	**Your email (consider a separate address for the store)**
Website (optional)	**Leave blank, or a public page about the app**
Phone (optional)	**Leave blank**

RELEASE NOTES FOR VERSION 1.0.0 (EN-US) *99 / 500 characters*

> First release of Breath: a quiet daily count of breaths, and a way to gift one to someone you love.

RELEASE NAME

> 1.0.0

3 · App content forms

Policy and programs → App content. These answers describe the app as it is in the code today: no accounts, no network use, no data collected.

Privacy policy

Privacy policy URL	**https://github.com/aviratna/breath-app/blob/main/PRIVACY.md**

App access

Is any part of your app restricted?	**All functionality is available without special access**

Ads

Does your app contain ads?	**No**

Content rating (IARC questionnaire)

Email for rating certificate	**Your email**
Category	**All Other App Types**
Violence, blood, fear	**No to all**
Sexuality, nudity	**No to all**
Language (profanity, crude humour)	**No**
Controlled substances (drugs, alcohol, tobacco)	**No**
Gambling or simulated gambling	**No**
Can users interact or exchange content with each other?	**No (the current version sends nothing between devices)**
Does the app share the user's current location?	**No**
Does the app allow purchasing digital goods?	**No**
Expected result	**Everyone / PEGI 3 / IARC 3+**

Target audience and content

Target age groups	**18 and over**
Could the app unintentionally appeal to children?	**No**
Store listing appeals to children?	**No**

Choosing only 18+ keeps the app out of the Families policy, which adds extra requirements. You can widen this later.

Other declarations

News app?	**No**
COVID-19 contact tracing or status app?	**No**
Government app?	**No**
Financial features	**My app doesn't provide any financial features**
Health apps	**My app does not have any health features (the count is a contemplative estimate, not health data)**
Advertising ID: does your app use it?	**No**
Account deletion	**Not applicable: the app has no accounts**

4 · Data safety form

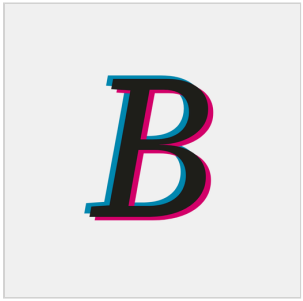

Does your app collect or share any of the required user data types?	**No**
Is all user data encrypted in transit?	**Not asked once you answer No above (no data is sent)**
Do you provide a way for users to request deletion of data?	**Not asked: no data is collected**
Resulting store label	**“No data collected · No data shared with third parties”**

> **Keep this accurate.** If a later version sends gifts between real people (accounts, contacts, a server), the Data safety form, privacy policy and content rating “users interact” answer must all be updated *before* that version is released.

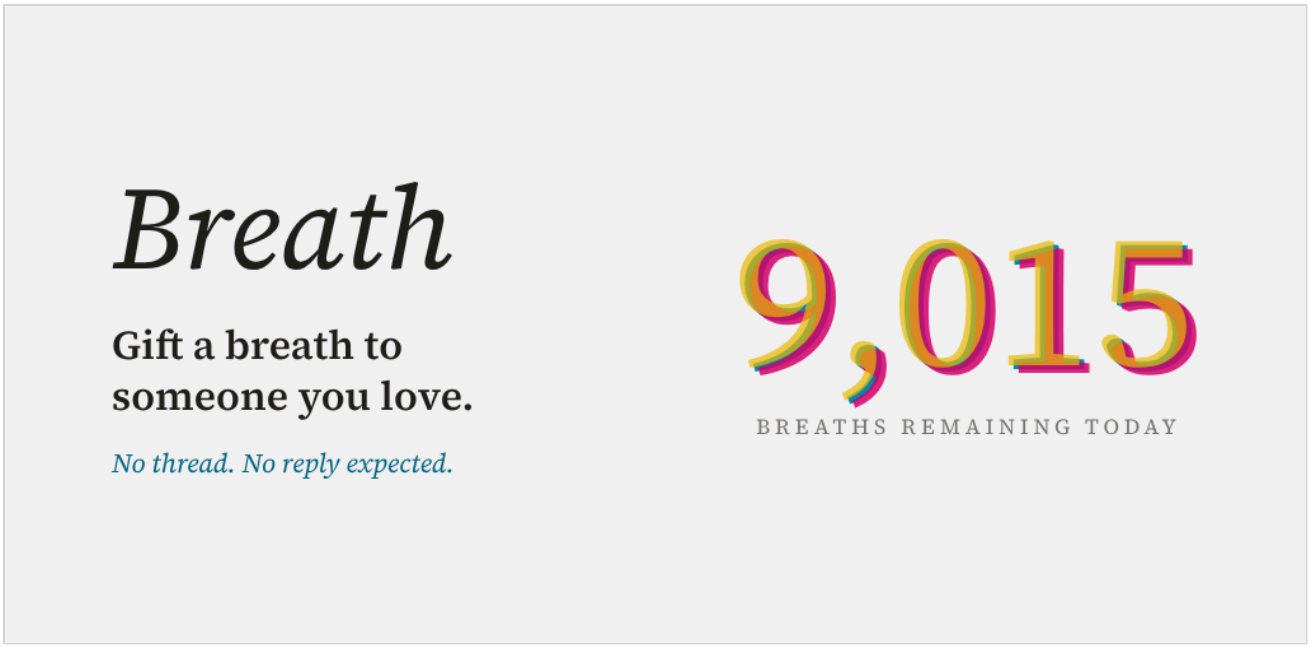

5 · Graphics

Upload these files under Main store listing → Graphics. They are in the **breath-play-assets.zip** sent with this PDF.

App icon: icon-512.png (512 × 512 PNG)

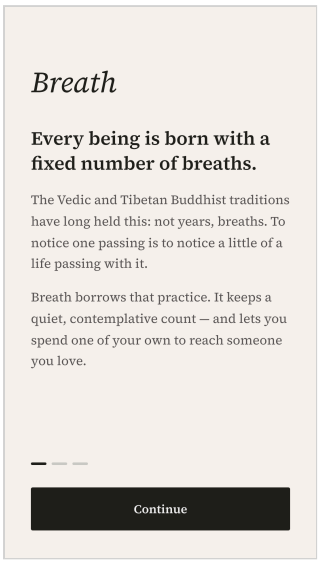

Feature graphic: feature-graphic-1024x500.png (1024 × 500)

5 · Graphics (continued): phone screenshots (1080 × 1920, 9:16)

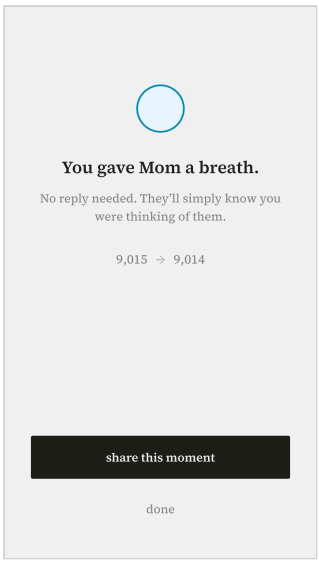

Upload in this order (Play needs 2–8; use all 8). Taken from the real app.

01-onboarding.png

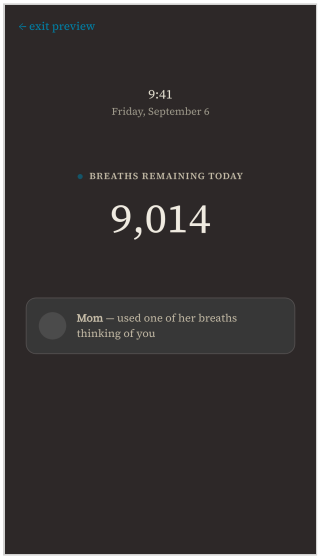

04-home.png

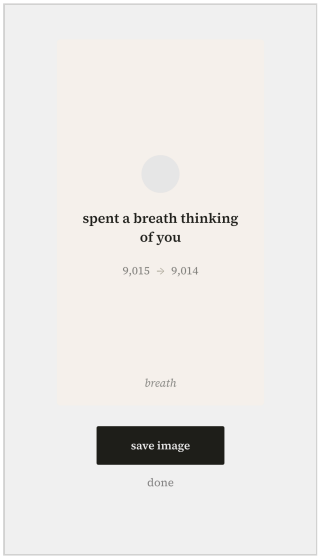

05-sent.png

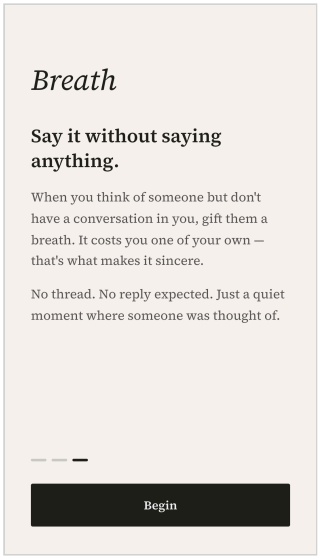

08-receiving.png

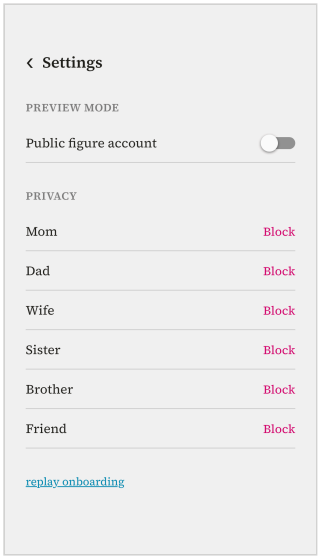

07-lock-screen.png

06-share-card.png

03-onboarding.png

09-settings.png

Tablet screenshots are optional; skip them for the first release.

6 · Privacy policy

Public URL (paste this into Play Console):
https://github.com/aviratna/breath-app/blob/main/PRIVACY.md

Breath — Privacy Policy

Last updated: 24 October 2026

Breath ("the app") is a contemplative app that shows an estimated count of breaths remaining in the day and lets you "gift a breath" to someone.

What the app collects

Nothing. The current version of Breath:

• does not ask you to create an account or sign in;
• does not collect, store or transmit any personal information;
• does not access your contacts, location, camera, microphone or files. The names shown in the app ("Mom", "Dad", and so on) are built-in examples;
• does not use analytics, advertising or tracking SDKs;
• does not send data over the network. Everything happens on your device.

The app saves a few settings on your device only, so it can remember them between launches: how many breaths you have gifted today, which names you have blocked, and whether you have seen the introduction. They never leave your phone and are deleted when you uninstall the app or clear its storage.

Because no data is collected, none is shared with or sold to third parties.

Children

Breath is not directed at children under 13 and collects no information from anyone, including children.

Changes

If a future version adds features that need data (for example, sending a gift to a real person), this policy will be updated before that version is released, and the "Last updated" date above will change.

Questions about this policy: open an issue at https://github.com/aviratna/breath-app/issues

7 · Fix before the production release

Fine for internal and closed testing. Google's production review checks that the app does what its listing says.

> **Fixed:** the breath count is now real (15 breaths a minute times the minutes left until midnight, minus breaths gifted today; it resets at midnight and is remembered between launches). “Save image” now creates a real image and opens the share sheet. The onboarding quote now reads “often attributed to the Buddha”.

> **Still to do: real gift delivery.** The contacts (Mom, Dad, Wife…) are built-in examples, and a gift only lowers your own count. Incoming gifts are simulated. Making this real needs a small backend (planned with Supabase: sign-in, adding people by invite link, sending a gift, and a notification on the other person's phone). When it ships, update the Data safety form, privacy policy and the content rating “users interact” answer.

> **Already handled:** real app icon, store graphics, signing key (created and stored by Expo), public privacy policy, automatic version-code increments, and an automatic Play upload once you add the Google service-account key.

Later: automatic uploads to Play

After the first manual upload, create a Google Cloud service account with a JSON key, invite its email in Play Console → Users and permissions with *Release* access to Breath, and save the JSON as the GitHub secret `GOOGLE_SERVICE_ACCOUNT_JSON`. From then on, each Play build uploads itself to the internal track as a draft.
