Breath: Google Play launch kit

Package **com.aviratna.breath** · version 1.0.0 · prepared 24 October 2026

Everything to copy and paste into Play Console once your developer account is approved, in the order Play Console asks for it.

Where things stand

✓	Android app builds automatically on GitHub; installable APK published
✓	Real Breath app icon (replaces Expo's placeholder), feature graphic and 8 screenshots: section 5
✓	Store listing text written and length-checked: section 2
✓	Privacy policy written: section 6
✓	Answers for every App content form: sections 3 and 4
○	**Waiting on Google:** developer account identity verification
✓	Privacy policy is public: github.com/aviratna/breath-app/blob/main/PRIVACY.md
✓	Fake features fixed: real breath count, working share image, quote attribution (section 7)
✓	Gifts reach real people (Firebase): invite codes, blocking, account deletion

On approval day, in order

1. **Create app**: fill the form with the answers in section 1.
2. **Get the upload file:** on GitHub, open *Actions* → *Android release* → *Run workflow*, choose **play**, then **Run workflow**. About 15 minutes later, download `breath.aab` from the newest *"Breath Play Store bundle"* pre-release on the repo's Releases page. Or ask Claude to do it.
3. **Testing** → **Internal testing** → **Create new release:** accept *Play App Signing*, upload `breath.aab`, paste the release notes (section 2), add yourself as a tester and roll out.
4. **Grow your users** → **Store presence** → **Main store listing:** paste the text (section 2) and upload the graphics (section 5).
5. **Policy and programs** → **App content:** answer each form with sections 3 and 4.
6. **Closed testing:** new personal accounts must run a closed test with **at least 12 testers opted in for 14 days in a row** before Google allows a production release. Start collecting Gmail addresses of 12+ people now.
7. **Production:** after 14 days, apply for production access in the Dashboard and promote the release.

1 · Create app form

App name	**Breath**
Default language	**English (United States) – en-US**
App or game	**App**
Free or paid	**Free**
Declarations: Developer Program Policies	**Tick (accept)**
Declarations: US export laws	**Tick (accept)**
Declarations: Play App Signing terms	**Tick (accept)**

2 · Main store listing text

APP NAME *21 / 30 characters*

> Breath: Gift a Breath

SHORT DESCRIPTION *79 / 80 characters*

> A quiet daily count of your breaths, and a way to gift one to someone you love.

FULL DESCRIPTION *1275 / 4000 characters*

> Every being is born with a fixed number of breaths.
>
> The Vedic and Tibetan Buddhist traditions have long held this: not years, breaths. To notice one passing is to notice a little of a life passing with it.
>
> Breath borrows that practice. It keeps a quiet, contemplative count of the breaths remaining in your day, and lets you spend one of your own to reach someone you love.
>
> GIFT A BREATH
> Hold a name to send. It costs you one breath of your own, and that is what makes it sincere. No thread. No reply expected. They simply know you were thinking of them.
>
> WHAT'S INSIDE
> • A daily count of breaths remaining: a contemplative estimate, not a prediction
> • Invite the people you love with a simple code
> • Gift a breath with a single long press
> • Receive a gift and choose to just smile, or breathe one back
> • Share the moment as a simple, quiet card
> • Public figure mode: one to one, not one to a million
> • Block anyone from the privacy settings
>
> A QUIET DESIGN
> Paper-white pages and serif type. No feeds, no likes, no streaks.
>
> PRIVATE BY DESIGN
> Just a name: no email, no phone number, no password. No ads, no tracking. Only the people you connect with can send you a breath, and you can block anyone.
>
> Breath is a device for attention. It is not a medical or actuarial tool.

Store settings

App category	**Lifestyle**
Tags (pick up to 5)	**Meditation, Mindfulness, Wellbeing, Relationships (whichever Play offers)**
Contact email (required, shown publicly)	**Your email (consider a separate address for the store)**
Website (optional)	**Leave blank, or a public page about the app**
Phone (optional)	**Leave blank**

RELEASE NOTES FOR VERSION 1.0.0 (EN-US) *99 / 500 characters*

> First release of Breath: a quiet daily count of breaths, and a way to gift one to someone you love.

RELEASE NAME

> 1.0.0

3 · App content forms

Policy and programs → App content. These answers describe the app as built: an anonymous account with a chosen name, gifts stored in Google Firebase, no ads and no analytics.

Privacy policy

Privacy policy URL	**https://github.com/aviratna/breath-app/blob/main/PRIVACY.md**

App access

Is any part of your app restricted?	**All functionality is available without special access**

Ads

Does your app contain ads?	**No**

Content rating (IARC questionnaire)

Email for rating certificate	**Your email**
Category	**All Other App Types**
Violence, blood, fear	**No to all**
Sexuality, nudity	**No to all**
Language (profanity, crude humour)	**No**
Controlled substances (drugs, alcohol, tobacco)	**No**
Gambling or simulated gambling	**No**
Can users interact or exchange content with each other?	**Yes (users send each other gifts; there is no free text, chat or media)**
Does the app share the user's current location?	**No**
Does the app allow purchasing digital goods?	**No**
Expected result	**Everyone / PEGI 3, with a “Users Interact” notice**

Target audience and content

Target age groups	**18 and over**
Could the app unintentionally appeal to children?	**No**
Store listing appeals to children?	**No**

Choosing only 18+ keeps the app out of the Families policy, which adds extra requirements. You can widen this later.

Other declarations

News app?	**No**
COVID-19 contact tracing or status app?	**No**
Government app?	**No**
Financial features	**My app doesn't provide any financial features**
Health apps	**My app does not have any health features (the count is a contemplative estimate, not health data)**
Advertising ID: does your app use it?	**No**
Account deletion: does your app let users create an account?	**Yes**
Account deletion URL	**https://github.com/aviratna/breath-app/blob/main/DELETE-ACCOUNT.md**
Can users delete some data without deleting the account?	**No**

4 · Data safety form

Overview

Does your app collect or share any of the required user data types?	**Yes**
Is all of the user data collected by your app encrypted in transit?	**Yes**
Which account creation methods does your app support?	**Other: anonymous account with a chosen display name**
Account deletion URL	**https://github.com/aviratna/breath-app/blob/main/DELETE-ACCOUNT.md**
Do you provide a way for users to request that their data is deleted?	**Yes**

Data types: tick only these

Personal info → Name	**Collected · not shared · required · purpose: App functionality**
Personal info → User IDs	**Collected · not shared · required · purpose: App functionality, Account management**
App activity → Other user-generated content (gifts sent and received)	**Collected · not shared · required · purpose: App functionality**
Everything else (location, contacts, photos, health, financial, device IDs, analytics…)	**Not collected**

For each ticked type

Is this data processed ephemerally?	**No**
Is this data required or optional?	**Required**
Is it shared with third parties?	**No (Google Firebase is a service provider, which doesn't count as sharing)**

> **Keep this accurate.** If you later add analytics, crash reporting or push notifications, update this form and the privacy policy before that version is released.

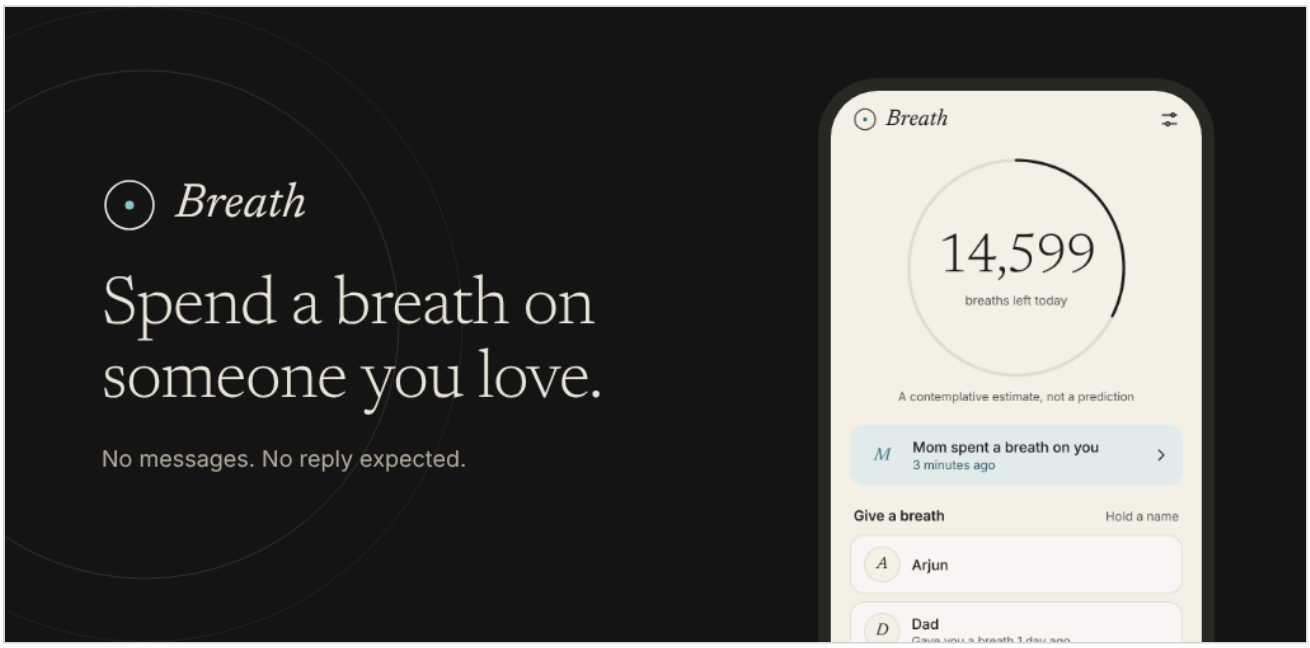

5 · Graphics

Upload these files under Main store listing → Graphics. They are in the **breath-play-assets.zip** sent with this PDF.

App icon: icon-512.png (512 × 512 PNG)

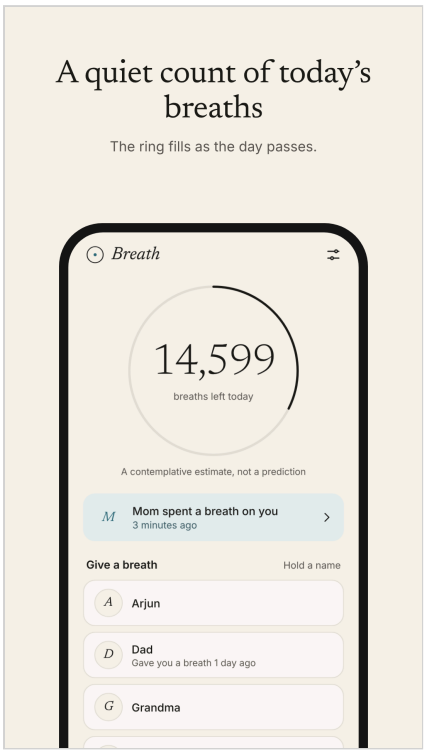

Feature graphic: feature-graphic-1024x500.png (1024 × 500)

5 · Graphics (continued): phone screenshots (1080 × 1920, 9:16)

Upload in this order (Play needs 2–8; use all 6). Real app screens with captions.

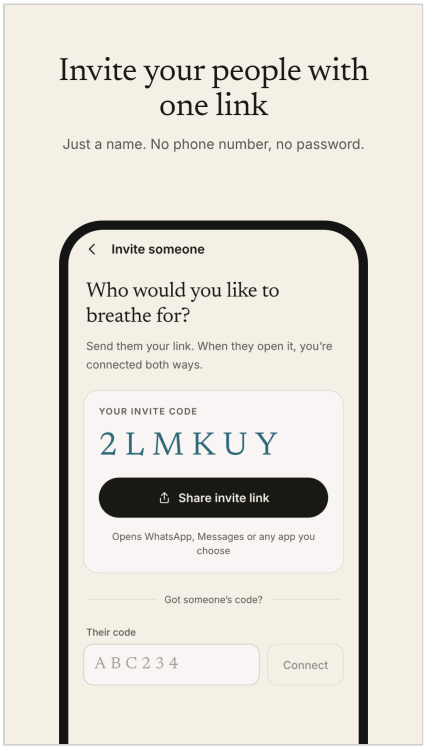

01-todays-breaths.png

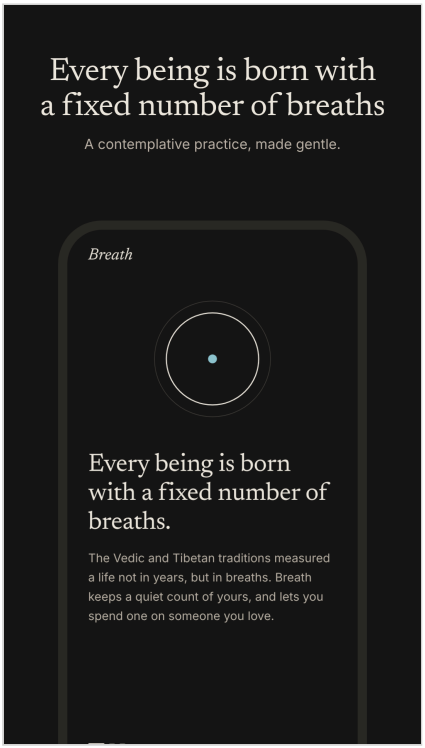

02-hold-to-give.png

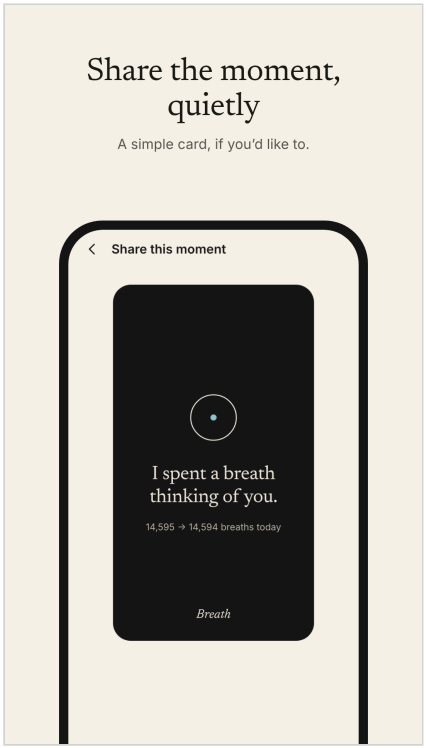

03-received.png

04-invite.png

05-welcome.png

06-share.png

Tablet screenshots are optional; skip them for the first release.

6 · Privacy policy

Public URL (paste this into Play Console):
https://github.com/aviratna/breath-app/blob/main/PRIVACY.md

Breath — Privacy Policy

Last updated: 24 October 2026

Breath ("the app") is a contemplative app that shows an estimated count of breaths remaining in the day and lets you "gift a breath" to people you are connected with.

What we collect, and why

| Data | Why | Shared with | |---|---|---| | The name you type in | Shown to the people you connect with and gift breaths to | Only people you are connected with | | An anonymous account ID | Created automatically so the app knows which gifts are yours. No email, phone number or password is involved | No one | | Your invite code | Lets someone connect with you when you share it | Anyone you give it to | | Your connections (names of people you connected with, and whether you blocked them) | To show your list of people and enforce blocking | No one | | Gifts you receive (who sent it and when) | To show you the gift | No one |

This data is stored in Google Firebase (Cloud Firestore, Singapore region), which Breath uses as its server. It is encrypted in transit. It is not used for advertising, not sold, and not shared with any other party.

Breath does not access your contacts, location, camera, microphone or photos, and does not use analytics, advertising or tracking SDKs.

The app also saves a few settings on your device only: how many breaths you have gifted today and whether you have seen the introduction. These never leave your phone and are removed when you uninstall the app.

When you choose "share image", the app creates a picture of your card and hands it to the app you pick in the share sheet. Breath does not keep or upload it.

Deleting your data

In the app: Settings → Account → delete my account. This permanently deletes your name, code, connections and received gifts from Breath's server, and your anonymous account. Details and other options: [account deletion](DELETE-ACCOUNT.md).

Children

Breath is not directed at children under 13.

Changes

If this policy changes, the "Last updated" date above will change.

7 · Fix before the production release

Fine for internal and closed testing. Google's production review checks that the app does what its listing says.

> **Fixed:** the breath count is real (15 breaths a minute times the minutes left until midnight, minus breaths gifted today). “Share image” creates a real image and opens the share sheet. The quote reads “often attributed to the Buddha”. **Gifts now reach real people** through Firebase: you choose a name, connect by invite code, and gifts appear on the other person’s phone, with blocking and in-app account deletion.

> **Next improvement: notifications.** Gifts show up when the other person opens Breath. Phone notifications need Firebase Cloud Messaging set up for Android. Not required for Play approval.

> **Already handled:** real app icon, store graphics, signing key (created and stored by Expo), public privacy policy, automatic version-code increments, and an automatic Play upload once you add the Google service-account key.

Later: automatic uploads to Play

After the first manual upload, create a Google Cloud service account with a JSON key, invite its email in Play Console → Users and permissions with *Release* access to Breath, and save the JSON as the GitHub secret `GOOGLE_SERVICE_ACCOUNT_JSON`. From then on, each Play build uploads itself to the internal track as a draft.
